Show more BE CAREFUL!! Nobody here can help you or even suggest how you can get your ex or love back,any testimonies of most spell casters here must be ignored, because most of them are scam i mean real scam which i was a victim of and i got ripped of thousands of dollars because i was so anxious to get my husband back after he left me for over a year with my little daughter, i have applied to 7 different spell casters here and all to no avail they all ask for same thing like, SEND YOUR NAME, YOUR EX-LOVER NAME, ADDRESS, PICTURE and PHONE NUMBER, Which i did over and over again and most of them were from west Africa until i saw a post about Dr Alabi and i decided to give him my last try. He asked me to send JUST MY REAL NAME and PICTURE. He immediately told me the names of my relatives, I was shocked, it was as if he knew me before and he said my ex will come back to me in 3days, i was thinking about how much i have lost so far, so i said let me give him a try, i did all what he asked me to do, He told me to wait till next 3 days and i couldnt sleep those night because i really love my husband and wanted him back. At 8pm the third day i saw my husband on line on facebook and he said Hi, at first i was shocked because he has never spoken with me for the past year, I did not reply, again he said are you there? i quickly reply YES and he asked if we can see the next day, i said yes and he went off-line. I was confused i try to chat him up again but he was no longer on line. By 7am the next morning he gave me a miss call, i decided not to call back as i was still on shock again he called and i answered, he said can we see after work today i said YES, he ended the call. Immediately i got off work he called me and we met and now we are back again. I called Dr Alabi the next day thanking him for what he has done. Infact till today, i still call him and thank him as my life was not complete without my husband. Please be careful here for i have been scammed thousands of dollars. If you want a true love spell, then contact Dr Alabi ON HIS EMAIL dralabisolutioncenter1@gmail.com Searching for BSc books & notes for free in pdf? Well, you're in the right place. Part - I & II by Dr. A. B. Bhise, Dr. R. B. Bhise We are happy to place this book "T.Y.B.Sc. Practical Physics (Part-I & II)" in the hands of B.Sc. students and teachers as per new syllabus. This book envisages the revised syllabus which is implemented from the academic year 2015-16. It is general impression of physics students that physics practicals are very difficult, hence the experimental matter is prescribed in a simple and lucid manner with the help of neat and clear figures of instruments. This book gives a brief description of experiments of physics which are chosen as per the latest curriculum. The experiments include oscillations, waves, sound, optics, electronics, instrumentation, computer and demonstrations. Each experiment is discussed with Aim, Apparatus, Diagram, Procedure, Observations, Observation table, Formulae and Results. The theory of experiment is presented in brief in the principle with necessary formula and its explanation. This book Useful for B.Sc students. Part - I 1. Coefficient of Viscosity of liquid using Rotating cylinder method 2. Moment of Inertia by Bifilar suspension 3. Young's modulus by Newton's rings 4. Young's modulus by Koenig method 5. Determination of wavelength of light by Michelson's interferometer 6. Surface tension of liquid by Fergussion method 7. Surface tension of mercury by Quincke's method 8. Study of Hall's Effect 9. Energy band gap of semiconductors 10. Study of X-ray spectra 11. Resistivity by Four probe method 12. Platinum resistance thermometer 13. Determination of Rydberg's constant 14. Lloyd's mirror 15. Determination of Resolving Power of grating 16. Determination of wavelength by Constant deviation spectrometer 17. Verification of Stefan's law by torch bulb filament 18. Thermal conductivity by Forbes method 19. Thermal conductivity of rubber tubing 20. Characteristics of G.M. tube 21. Inverse square law (γ-rays) 22. Specific charge (e/m) by Thomson's method 23. Determination of Planck's constant 24. Self Inductance by Anderson's bridge 25. Core losses in transformers 26. Electromagnetic pendulum 27. Self Inductance by Maxwell's bridge Part - II 1. Characteristics of JFET (not for advance electronics) 2. Design and built astable multivibrator using IC 555 (not for advance electronics) 3. IC 723 as regulated power supply (not for advance electronics) 4. Instrumentation amplifier using three op-amps (not for basic electronics) 5. Temperature controller using thermistor temperature sensors (not for basic electronics) 6. Object counter (two digit) (not for basic electronics) 7. Study of LVDT (not for basic electronics) 8. Frequency response of loudspeaker (twitter, woofer, mid-range) 9. Study of interference by Quincke's method 10. Use of Ultrasonic interferometer to measure velocity of sound in liquids 11. Study of diffraction using a reflection grating (metal ruler) 12(a) Study of the characteristics of a laser beam 12(b) Divergence of laser beam 13. Determination of the diameter of a thin wire using a laser beam 14. Charging and discharging of capacitor and RC time constant 15. Velocity of sound using Computer interface 16. IV Characteristics of diode 17. Factorial of a number 18. To find out the first 100 prime numbers 19. Matrix multiplication 20. Graphics (line, circle, ellipse) 21. Roots of polynomial (Newton Raphson) 22. Trapezoidal and Simpson's 1/3 rule Principles Related to Practical Chemistry PDF Notes, Important Questions and Synopsis.
